Anti-SARS-CoV Spike Protein, Rabbit-Polyclonal Antibody

Catalog No. GB-10314M **Quantity:** 250 μl **Antigen species:** Synthetic SARS-CoVpeptide
Reactivity: SARS-CoV **Applications tested:** ELISA, epitope mapping
Host species: rabbit **Type:** polyclonal antibodies **Form:** lyophilized serum

Target description

Severe Acute Respiratory Syndrome (SARS), an emerging disease characterized by atypical pneumonia, has recently been attributed to a novel coronavirus (SARS-CoV). The spike (S) protein was one of the structural proteins of SARS-CoV (N, S, sE, M), which epitopes were defined by parallel comparison of SARS-CoV infected and non-infected human sera with Epitoscreen™ peptide array. The S glycoprotein of SARS-CoV is not only responsible for receptor binding and virus fusion, but also a major antigen among the SARS-CoV proteins that induces protective antibody responses.

Antigen

This polyclonal antibody was raised by immunizing rabbit with synthetic peptide mixture containing amino acids on the N-terminal domain (90-114) of spike protein (S) of SARS-CoV. The antigen contained the epitope defined by Epitoscreen™ peptide array (Genesis Biotech Inc.).

Application

The antibody specificity was assayed by ELISA with the synthetic peptide antigen of spike protein of SARS-CoV, which epitopes were defined by parallel comparison of SARS-CoV infected and non-infected human sera. The antibody titer is more than 6K for ELISA. It has not been tested in the other applications. However, for the first testing, we recommend 1/5,000 dilution for ELISA, 1/1000 dilution for Western blot analysis (WB) of recombinant protein, 1/400 dilution for tissue extracts or cell lysates, 1/100 dilution for immunohistochemistry (IHC) staining on frozen cryosections or paraffin embedded sections.

Storage

It is supplied as lyophilized antiserum of polyclonal antibody. Rehydrate the lyophilized powder with 250 μl sterile water will have the same concentration with original antiserum. Store at 4°C for short term application. For long-term storage, aliquot and store at -20°C.
